Re: WP Pennsylvania, LLC  
WWII (AM), Shiremanstown, Pennsylvania  
Facility Identification Number: 26973  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed December 21, 2010, on behalf of WP Pennsylvania, LLC ("WPP"). WPP requests special extension of the temporary authority ("STA") granted on June 25, 2010, to operate Station WWII with temporary facilities.<sup>1</sup>

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee reports no progress toward restoration of licensed operation. However, we note that WPP recently acquired Station WWII on November 5, 2010. In light of the recent change in licensee, we will grant the requested extension in order to allow time for WPP to initiate efforts to restore licensed operation.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WWII may continue to operate with the following facilities:

---

<sup>1</sup> WWII is licensed for operation on 720 kHz with 2 kilowatts, daytime hours only, employing a nondirectional antenna (ND-D-D).

Geographic coordinates	40° 12' 58" N, 76° 58' 08" W (NAD 1927)
Frequency	720 KHz
Hours of operation	Daytime only
Operating power	Not to exceed 2 kW
Antenna type	Horizontal wire
Antenna efficiency	240 mV/m/km/kW
Overall height	18 meters (60')

It will be necessary to further reduce power or cease operation if complaints of interference are received. It is anticipated that an application for construction permit to relocate the transmitter will be filed prior to the expiration date below. WPP must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 4, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".
